## History of the Earth, Lesson 6: Three Types of Rocks

### Read Aloud Review

Today we learned about three different types of rocks and how they are made. Cut and paste the ingredients for each kind of rock type. Then, write the name of each type of rock from the work box on the line below.

igneous

sedimentary

metamorphic

## Word Work

trace over the word:

# Sediments

*Meaning:* **Sediments** are tiny particles of dirt or rock that are moved by wind or water.

If you had a swimming pool, what kinds of **sediments** could you find in it?

Some **sediments** I could find are \_\_\_\_\_.
